Why I chose this game:

- **I personally really enjoy playing it**

- **This game has a good opportunity to display all learned skills in HTML, CSS and JavaScript**

- **Has potential for further improvements**

Rules

- At the beginning of the game, you choose your one lucky briefcase out 26 (Each briefcase randomly contains cash value from $1- $1,000,000)

- Then the game starts, and the goal is to to eliminate cases, that you think have the lower amounts of cash.
